Plants and animals will find it difficult to escape from or adjust to the effects of global warming. Scientists have already observed shifts in the lifecycles of many plants and animals, such as flowers blooming earlier and birds hatching earlier in the spring. Many species have begun shifting where they live or their annual migration patterns due to warmer temperatures.

With further warming, animals will tend to migrate toward the poles and up mountainsides toward higher elevations. Plants will also attempt to shift their ranges, seeking new areas as old habitats grow too warm. In many places, however, human development will prevent these shifts. Species that find cities or farmland blocking their way north or south may become extinct. Species living in unique ecosystems, such as those found in polar and mountaintop regions, are especially at risk because migration to new habitats is not possible. For example, polar bears and marine mammals in the Arctic are already threatened by dwindling sea ice but have nowhere farther north to go.

Projecting species extinction due to global warming is extremely difficult. Some scientists have estimated that 20 to 50 percent of species could be committed to extinction with 2 to 3 Celsius degrees of further warming. The rate of warming, not just the magnitude, is extremely important for plants and animals. Some species and even entire ecosystems, such as certain types of forest, may not be able to adjust quickly enough and may disappear.

Ocean ecosystems, especially fragile ones like coral reefs, will also be affected by global warming. Warmer ocean temperatures can cause coral to “bleach”, a state which if prolonged will lead to the death of the coral. Scientists estimate that even 1 Celsius degree of additional warming could lead to widespread bleaching and death of coral reefs around the world. Also, increasing carbon dioxide in the atmosphere enters the ocean and increases the acidity of ocean waters. This acidification further stresses ocean ecosystems.

From “Global Warming” by Michael Mastrandrea and Stephen H. Schneider

Question 32: Scientists have observed that warmer temperatures in the spring cause flowers to ______.
A. bloom earlier  
B. die instantly  
C. become lighter  
D. lose color

Question 33: According to paragraph 2, when their habitats grow warmer, animals tend to move ______.
A. toward the North Pole and down mountainsides toward lower elevations  
B. toward the poles and up mountainsides toward higher elevations  
C. south-eastwards and down mountainsides toward lower elevations  
D. north-westwards and up mountainsides toward higher elevations

Question 34: The pronoun “those” in paragraph 2 refers to ______.
A. areas  
B. habitats  
C. species  
D. ecosystems

Question 35: The phrase “dwindling sea ice” in paragraph 2 refers to ______.
A. the cold ice in the Arctic  
B. the violent Arctic Ocean  
C. the melting ice in the Arctic  
D. the frozen water in the Arctic

Question 36: It is mentioned in the passage that if the global temperature rose by 2 or 3 Celsius degrees, ______.
A. half of the earth’s surface would be flooded  
B. water supply would decrease by 50 percent  
C. the sea level would rise by 20 centimeters  
D. 20 to 50 percent of species could become extinct

Question 37: According to the passage, if some species are not able to adjust quickly to warmer temperatures, ______.
A. they will certainly need water  
B. they can begin to develop  
C. they may be endangered  
D. they move to tropical forests

Question 38: The word “fragile” in paragraph 4 most probably means ______.
A. pretty hard  
B. easily damaged  
C. rather strong  
D. very large

Question 39: The bleaching of coral reefs as mentioned in paragraph 4 indicates ______.
A. the slow death of coral reefs  
B. the blooming phase of sea weeds  
C. the quick growth of marine mammals  
D. the water absorption of coral reefs

Question 40: The level of acidity in the ocean is increased by ______.
A. the loss of acidity in the atmosphere around the earth  
B. the decrease of acidity of the pole waters  
C. the extinction of species in coastal areas  
D. the rising amount of carbon dioxide entering the ocean
Question 41: What does the passage mainly discuss?
A. Global warming and possible solutions
B. Global warming and species migration
C. Influence of climate changes on human lifestyles
D. Effects of global warming on animals and plants

Read the following passage and mark the letter A, B, C, or D on your answer sheet to indicate the correct word or phrase that best fits each of the numbered blanks from 42 to 51.

Library is a collection of books and other informational materials made available to people for reading, study, or reference. The word library comes (42)______ liber, the Latin word for “book”. (43)______, library collections have almost always contained a variety of materials. Contemporary libraries maintain collections that include not only printed materials such as manuscripts, books, newspapers, and magazines, (44)______ audio-visual and online databases. In addition (45)______ maintaining collections within library buildings, modern libraries often feature telecommunications links that provide users with access to information at remote sites.

The central mission of a library (46)______ to collect, organize, preserve, and provide access to knowledge and information. In fulfilling this mission, libraries preserve a valuable record of culture that can be passed down to (47)______ generations. Libraries are an essential link in this communication between the past, present, and future. Whether the cultural record is contained in books or in electronic formats, libraries ensure (48)______ the record is preserved and made available for later use.

People use library resources to gain information about personal (49)______ or to obtain recreational materials such as films and novels. Students use libraries to supplement and enhance their classroom experiences, to learn (50)______ in locating sources of information, and to develop good reading and study habits. Public officials use libraries to research legislation and public policy issues. One of the most valued of all cultural institutions, the library (51)______ information and services that are essential to learning and progress.

Question 49: A. attractions B. appeals C. interests D. profits
Question 50: A. abilities B. skills C. capacities D. talents
Question 51: A. digests B. applies C. relates D. supplies

Mark the letter A, B, C, or D on your answer sheet to indicate the word(s) CLOSEST in meaning to the underlined word(s) in each of the following questions.

Question 52: When Susan invited us to dinner, she really showed off her culinary talents. She prepared a feast – a huge selection of dishes that were simply mouth-watering.
A. relating to medical knowledge B. concerning nutrition and health C. having to do with food and cooking D. involving hygienic conditions and diseases

Question 53: “It’s no use talking to me about metaphysics. It’s a closed book to me.”
A. an object that I really love B. a book that is never opened C. a subject that I don’t understand D. a theme that I like to discuss

Question 54: Suddenly, it began to rain heavily, so all the summer hikers got drenched all over.
A. cleansed B. refreshed C. completely wet D. very tired

Read the following passage and mark the letter A, B, C, or D on your answer sheet to indicate the correct answer to each of the questions from 55 to 64.

Overpopulation, the situation of having large numbers of people with too few resources and too little space, is closely associated with poverty. It can result from high population density, or from low amounts of resources, or from both. Excessively high population densities put stress on available resources. Only a certain
number of people can be supported on a given area of land, and that number depends on how much food and other resources the land can provide. In countries where people live primarily by means of simple farming, gardening, herding, hunting, and gathering, even large areas of land can support only small numbers of people because these labor-intensive subsistence activities produce only small amounts of food.

In developed countries such as the United States, Japan, and the countries of Western Europe, overpopulation generally is not considered a major cause of poverty. These countries produce large quantities of food through mechanized farming, which depends on commercial fertilizers, large-scale irrigation, and agricultural machinery. This form of production provides enough food to support the high densities of people in metropolitan areas.

A country’s level of poverty can depend greatly on its mix of population density and agricultural productivity. Bangladesh, for example, has one of the world’s highest population densities, with 1,147 persons per sq km. A large majority of the people of Bangladesh engage in low-productivity manual farming, which contributes to the country’s extremely high level of poverty. Some of the smaller countries in Western Europe, such as the Netherlands and Belgium, have high population densities as well. These countries practice mechanized farming and are involved in high-tech industries, however, and therefore have high standards of living.

At the other end of the spectrum, many countries in sub-Saharan Africa have population densities of less than 30 persons per sq km. Many people in these countries practice manual subsistence farming; these countries also have infertile land, and lack the economic resources and technology to boost productivity. As a consequence, these nations are very poor. The United States has both relatively low population density and high agricultural productivity; it is one of the world’s wealthiest nations.

High birth rates contribute to overpopulation in many developing countries. Children are assets to many poor families because they provide labor, usually for farming. Cultural norms in traditionally rural societies commonly sanction the value of large families. Also, the governments of developing countries often provide little or no support, financial or political, for family planning; even people who wish to keep their families small have difficulty doing so. For all these reasons, developing countries tend to have high rates of population growth.

**Question 55**: Which of the following is given a definition in paragraph 1?
- A. Poverty
- B. Population density
- C. Overpopulation
- D. Simple farming

**Question 56**: What will suffer when there are excessively high population densities?
- A. Available resources
- B. Farming methods
- C. Land area
- D. Skilled labor

**Question 57**: The phrase “that number” in paragraph 1 refers to the number of ______.
- A. resources
- B. countries
- C. people
- D. densities

**Question 58**: In certain countries, large areas of land can only yield small amounts of food because ______.
- A. there is an abundance of resources
- B. there is no shortage of skilled labor
- C. there are small numbers of laborers
- D. there is lack of mechanization

**Question 59**: Bangladesh is a country where the level of poverty depends greatly on ______.
- A. population density in metropolitan areas
- B. both population density and agricultural productivity
- C. its population density only
- D. its high agricultural productivity

**Question 60**: The phrase “engage in” in paragraph 3 is closest in meaning to ______.
- A. escape from
- B. look into
- C. give up
- D. participate in

**Question 61**: The word “infertile” in paragraph 4 probably means ______.
- A. impossible
- B. unproductive
- C. disused
- D. inaccessible

**Question 62**: Which of the following is TRUE, according to the passage?
- A. In sub-Saharan African countries, productivity is boosted by technology.
- B. There is no connection between a country’s culture and overpopulation.
- C. All small countries in Western Europe have high population densities.
- D. In certain developed countries, mechanized farming is applied.

**Question 63**: Which of the following is a contributor to overpopulation in many developing countries?
- A. High-tech facilities
- B. High birth rates
- C. Economic resources
- D. Sufficient financial support

**Question 64**: Which of the following could be the best title for the passage?
- A. High Birth Rate and its Consequences
- B. Poverty in Developing Countries
- C. Overpopulation: A Worldwide Problem
- D. Overpopulation: A Cause of Poverty
